Volume 186

ISAIAH L. KANTOR (Lund, Sweden) AND IVAN M. TRISHIN (Moscow, Russia)	
Formulas for Powers and Functions of Matrices	1
D. A. GREGORY (Kingston, Ontario, Canada), S. J. KIRKLAND, AND B. L. SHADER (Minneapolis, Minnesota)	
Pick's Inequality and Tournaments	15
GONGNING CHEN AND ZHENGCHONG YANG (Beijing, China)	
Bezoutian Representation via Vandermonde Matrices	37
HIROYUKI OSAKA (Okinawa, Japan)	
A Series of Absolutely Indecomposable Positive Maps in Matrix Algebras	45
JAVAD FAGHIH-HABIBI (New Concord, Ohio)	
The Gap of the Graph of a Matrix	55
MICHEL FLIESS (Gif-sur-Yvette, France), JEAN LÉVINE (Fontainebleau, France), AND PIERRE ROUCHON (Paris, France)	
Index of an Implicit Time-Varying Linear Differential Equation: A Noncommutative Linear Algebraic Approach	59
ZHAOJUN BAI (Lexington, Kentucky) AND JAMES W. DEMMEL (Berkeley, California)	
On Swapping Diagonal Blocks in Real Schur Form	73
JOHN ZHANG (Columbus, Ohio)	
Relative Growth of Linear Iterations and Orthogonal Polynomials on Several Intervals	97
J. A. BALL (Blacksburg, Virginia), J. KIM (Yongbong-Dong, Republic of Korea), L. RODMAN (Williamsburg, Virginia), AND M. VERMA (Montreal, Quebec, Canada)	
Minimal-Degree Coprime Factorizations of Rational Matrix Functions	117
A. FROMMER (Wuppertal, Germany) AND G. MAYER (Karlsruhe, Germany)	
Linear Systems With Ω -Diagonally Dominant Matrices and Related Ones	165
SCOTT H. HOCHWALD (Jacksonville, Florida)	
Natural Conditions on the Spectra of Operators	183
JIU DING (Hattiesburg, Mississippi)	
A Continuation Algorithm for a Class of Linear Complementarity Problems Using an Extrapolation Technique	199

Table of Contents continued

J. A. DIAS DA SILVA (Lisboa, Portugal)	
A Note on Preservers of Decomposability	215
ALBERTO BOROBIA (Madrid, Spain)	
Diagonals of Rotation Matrices	227
YOU HONG AND LAN JIZU (Changchun, People's Republic of China)	
Decomposition of Matrices Into 2-Involutions	235
JACOB C. ENGWERDA (Tilburg, the Netherlands), ANDRÉ C. M. RAN (Amsterdam, the Netherlands), AND ARIE L. RIJKEBOER (Tilburg, the Netherlands)	
Necessary and Sufficient Conditions for the Existence of a Positive Definite Solution of the Matrix Equation $X + A^*X^{-1}A = Q$	255
AUTHOR INDEX	277
